Data and Code Availability Statement

Data

BraTS 2020 and the processed BraTS-Africa TCIA release remain subject to their source access and licensing terms. Raw MRI volumes and labels are not redistributed by this project. Authorized users can reconstruct the study cohorts from versioned setup instructions, non-image manifests, and recorded source identifiers.

Code and analysis artifacts

The final release will contain source code, frozen configuration files, patient-level split assignments, environment records, data-integrity and overlap-audit outputs, statistical analysis code, figure-generation code, and permitted derived tables. The final Git tag, release URL, commit, archival DOI, and checkpoint-distribution decision are inserted only after the reproducibility and claim-provenance gates pass.

Current release identifiers

- Git repository: <https://github.com/TerekliTahaBerk/bratsarticle>
- Final Git tag: [PENDING FINAL RELEASE]
- Immutable commit: [PENDING FINAL RELEASE]
- Archival DOI: [PENDING FINAL RELEASE]
- Trained checkpoints: [AUTHOR AND LICENSE CONFIRMATION REQUIRED]

This statement does not imply redistribution permission for BraTS source data or any derivative that is restricted by the source terms.
